

Venkatraman Chandrasekar

Senior Product Owner → Product Manager · Platform & API Products

vc.atreya@gmail.com · 647-917-2912 · Ajax, ON (Toronto) · github.com/vcatreya-git · LinkedIn

PROFESSIONAL SUMMARY

Senior Product Owner with 15+ years driving product outcomes on enterprise banking platforms — not theory, not title. Deep in open banking (FDX), API platforms, payments modernisation, and ISO 20022 across multi-market programmes. Selected outcomes: IBS Fintech Innovation Award 2019 (QNB enterprise payments hub, 5 countries, ~60% STP improvement); inaugural BPS digital banking APIs for Western Alliance Bank; origination pre-processor ownership across Standard Chartered's 40+ market payments transformation. At FIS since 2021: product definition, roadmap, and phased execution for a multi-tenant Notification Platform — one outbound API replacing fragmented multi-vendor SMS/email/push integrations across bank channels.

PROFESSIONAL EXPERIENCE

Product Owner / TPM

Jul 2021 – Present

FIS

Virtual, Canada

FIS platform programmes (contractor Jul 2021 – Jan 2023; specialist Feb 2023 – present). Product ownership across open banking, payment APIs, and enterprise notifications — owning the problem definition, roadmap, and outcome through contracts, backlog, and release.

Current assignment — Enterprise Notification Platform

- Identified fragmented multi-vendor notification delivery as an integration liability for bank clients; defined and drove a multi-tenant Notification Platform — one outbound API replacing siloed SMS/email/push, with priority routing, failover, idempotency, and full audit trail.
- Owned product definition, roadmap, and phased execution from problem framing through Stage 1 foundation (vendor-agnostic delivery for SMS, email, and push).
- Staged roadmap (intelligence → event-driven delivery; voice post-foundation) designed so early integrators remain unaffected as the platform evolves.

Money Movement Hub — Origination APIs · Product Owner

- Owned product definition for payment initiation and core integration APIs connecting to IBS and HZN cores for enterprise clients.
- Drove requirements, API contracts, and solution design for origination flows and real-time status-update events.

Open Access Connect · Product Owner

- Owned open-banking data-sharing APIs (accounts, balances, transactions, statements) with consent and identity — FDX-aligned.
- Led gap analysis, backlog prioritization, and agile delivery with Tech, QA, and third-party integration stakeholders.

BPS Realtime Payments · Tech Lead / Product Owner · Jan 2024 – Dec 2024

- Led API delivery for real-time payment rails — sprint coordination, integration testing, and release readiness.

- Defined a provider-agnostic decision model for real-time rails; reverse-engineered legacy behaviour into serviceable product components and stories.

Wires API & Business Hub Phase II · Product Owner · Aug 2023 – Jan 2024

- Owned strategy and execution for Business Hub Phase II APIs with UI/UX-backed requirements and backend services.
- Closed functional/technical gaps and launched inaugural BPS digital banking APIs for Western Alliance Bank.

IBS Deposit Origination · Product Owner · Nov 2022 – Aug 2023

- Led modernization of Deposit Origination and Service Request Management, including CAT workflow and UX redesign with PM and design partners.
- Owned business-rule capture, backlog, and user stories from reverse engineering through delivery.

Banking Platform Services — ACH & Wires · Product Owner · Jul 2021 – Oct 2022

- Contributed channel-agnostic platform APIs for ACH; later led wires modernisation with external processors (e.g. eWires, Fundtech).
- Designed provider-agnostic decision support; refined backlog and architectural options with platform stakeholders.

Senior Manager · Lead Consultant · Implementation Consultant

May 2019 – Jun 2021

Capgemini Technology Services

Virtual, India

First Abu Dhabi Bank — Corporate Channel Rollout · Implementation Consultant · Aug 2020 – Jun 2021

- Led Saudi Arabia rollout of Corporate Web Portal and Host-to-Host (H2H) services with vendor coordination and backlog ownership.
- Defined journeys for onboarding, entitlements, accounts, H2H, bill payment, WPS, and statements; authored user stories from stakeholder workshops.

Standard Chartered — Global Payments Transformation · Lead Consultant · Aug 2019 – Jul 2020

- Owned the origination Pre-Processor in SCB's strategic payments transformation — phased migration to microservice SCPAY across 40+ markets while corporate channel and payment apps moved in parallel.
- Designed the integration bridge across mixed migration states (legacy/new channel × legacy/new payment), multi-format (IFX, ISO 20022, MT/SWIFT, Pain.001), and per product × country rollout plans.
- Led analysts on system studies, backlog, functional decomposition, and stories; documented as-is architecture and interface contracts.

Clearing Connect™ · Lead Consultant · Jun 2019 – Jul 2019

- Designed hub-to-CSM integration flows (use cases, sequence diagrams) and ISO 20022 → proprietary transformation rules.
- Ran requirement workshops and solution reviews; delivered Jira stories aligned to clearing-scheme constraints.

Consultant · Functional Anchor · Product Owner

Jun 2016 – May 2019

Edgeverve Limited

Doha · London · Dhaka · Medellín

Qatar National Bank — Enterprise Payments Hub · Functional Anchor · Mar 2017 – May 2019

- Led Finacle Enterprise Payments Hub for QNB across Qatar, France, UK, Singapore, and Kuwait as part of national payments modernisation.
- Delivered multi-entity, multi-currency architecture (15 payment types, 16 channels); ISO 20022 SOA consolidating QIPS/QATCH onto a real-time platform.
- Partnered with Finacle product engineering on base-product vs client build tradeoffs while the platform matured; authored FRSD/IRSD; drove UAT and post-go-live change.
- Integrations improved STP by ~60%. Awarded **Best Payments System Implementation — IBS Fintech**

Innovation Awards 2019.

BRAC Bank — Platform Migration · Functional Anchor

- Led payments-module gap analysis and Master Requirements Document for Finacle 7.x → 10.x migration; steered customization porting with bank stakeholders.

Bancolombia — Enterprise Implementation · Product Owner · Jul 2016 – May 2019

- Owned FCY and RTGS (SEBRA) tracks end-to-end — requirements, gap analysis, and solution design for SWIFT and RTGS integrations.

Lead Analyst · Payments & Channel Integrations

Mar 2013 – May 2016

Scope International (Standard Chartered GBS)

Chennai, India

- Led multi-system integrations across core banking, corporate (S2B), retail channels, payments, and reconciliation (TLM).
- Rolled out real-time payment capabilities in Singapore, Malaysia, Bahrain, and Sri Lanka with market-specific compliance.
- Owned requirements, interface specs, impact analysis, and change requests across multi-entity releases.

Systems Analyst · Product Delivery

May 2010 – Mar 2013

Tata Consultancy Services

Mumbai · Ulaanbaatar

- **Tata Capital / Tata Motor Finance:** Retail loan origination — design, build from HLD/LLD, SIT/UAT, production install, and change management.
- **Khan Bank (Mongolia):** Requirements, gap analysis, estimation, and solution documentation for loan origination.

EDUCATION

Executive MBA

2023 – 2024

Quantic School of Business and Technology

Bachelor of Engineering, Electrical

2005 – 2009

Anna University
