

Venkatraman Chandrasekar

Product Manager / Product Owner

Profile

- 15+ years of expertise in core banking, API banking, digital banking, payments preprocessing, payments hubs, and loan origination to tackle complex challenges.
- Excelled in analyzing requirements, conducting gap analyses, and designing innovative solutions tailored to global inter-bank schemes, ensuring robust problem resolution that aligns with business goals and regulatory demands.
- Spearheaded payments transformation initiatives with bespoke solutions and platforms like Finacle Payments, driving end-to-end product delivery. Demonstrated hands-on proficiency in requirement gathering, solution design, and documentation, consistently delivering scalable, high-impact payment products across markets like Qatar, India, UK, and Singapore.
- Expertise in multiple messaging protocols like ISO 150022(MT) & ISO 20022(MX) formats, Proprietary Formats, Integration with Bankers Almanac
- Hands-on exposure in Various Clearing Schemes like SWIFT, ACH & RTGS implementations in markets like QA, IN, UK, SG.

MMH Payment Origination API As Product Owner, led the development of the Payment Initiation API and core integration APIs for MMH, seamlessly connecting with IBS and HZN systems. Drove product vision, requirement gathering, and solution design, ensuring robust API functionality to support efficient payment processing and enhanced interoperability for enterprise clients.

SCB GBS Strategic Payments Platform (Multiple Asian Markets) Directed a team of business analysts to transform the payments infrastructure across 40+ markets into a cutting-edge, microservices-based bespoke platform. Spearheaded system studies, backlog grooming, functional decomposition, user story creation, and review. Formulated and executed product rollout and client migration strategies, prioritizing scalability and market-specific needs to deliver a future-ready payments ecosystem.

Clearing Connect™ (Middle East) Led product development for the Clearing Connect™ solution, integrating Payment Hubs with Clearing and Settlement Mechanisms (CSM) for regional clearing schemes. Oversaw validations, message transformations, and connectivity strategies, exploring last-mile connectivity solutions. Applied strategic prioritization to ensure compliance and operational efficiency, delivering a robust product tailored to Middle Eastern markets.

Qatar National Bank (QA, UK, FR, SG, KW) As Implementation Consultant, drove large-scale legacy system upgrades and regulatory compliance initiatives. Managed the multi-entity implementation of Finacle's Enterprise Payment Hub, enabling SWIFT, RTGS, ACH, and RTP functionalities across Qatar, UK, France, Singapore, and Kuwait. Responsibilities encompassed requirement gathering, gap analysis, solution design, delivery, back-office user training, and seamless transition to bank IT teams, ensuring stakeholder alignment and project success.

Bancolombia (Colombia) Served as Functional Consultant for SWIFT and RTGS tracks, leading requirement gathering and crafting the Master Requirements Document for Finacle Enterprise Payments implementation. Collaborated with stakeholders to design solutions that met regulatory and operational needs, ensuring smooth deployment and adoption of the payments platform.

SCB GBS Core Banking and Payments (Multiple Asian Markets) Managed critical change requests and integrations with core banking applications, including corporate (S2B) and retail channels (IB), payments systems (DotOpal, STS), and reconciliation platforms (TLM). Anchored integration requirements for RTP rollouts in Singapore, Malaysia, Bahrain, and Sri Lanka, prioritizing stakeholder needs and technical constraints to deliver cohesive, high-performance payment solutions.
